PREFACE

Karachi Stock Exchange Limited (KSEL), formerly known as the Karachi Stock Exchange (Guarantee) Limited, was corporatized and demutualized as a company limited by shares with effect from August 27, 2012 pursuant to promulgation of Stock Exchanges (Corporatisation, Demutualization & Integration) Act, 2012 on May 7, 2012.

The above development necessitated a comprehensive review of the regulatory framework of the KSEL which was previously set out in different sets of regulations resulting in duplication and difficulty in handling these regulations. In order to ensure harmonization, conciseness, address redundancies and integration of the separate sets of regulations, it was endeavored to consolidate these regulations at a single place in line with international best practices. Accordingly, with the joint efforts of KSEL and the Securities and Exchange Commission of Pakistan (SECP), the Rule Book was compiled as a single consolidated document and approved by the SECP in exercise of the powers conferred upon it under Securities and Exchange Ordinance, 1969.

The Rule Book also incorporates requisite regulatory amendments to the regulatory framework of the KSEL consequent to the corporatization and demutualization of the KSEL. These amendments provide regulatory cover to a number of structural changes at KSEL in the wake of demutualization including, segregation of regulatory and commercial functions of the KSEL, introduction of the concept of Base Minimum Capital, formation of Regulatory Affairs Committee (RAC) and Regulatory Affairs Division (RAD), the appointment of Chief Regulatory Officer (CRO) as the head of the RAD, recognition of the role of the RAC and the CRO in the regulatory, enforcement and arbitration domains etc.

The Rule Book is divided in chapters which represent the existing regulations of KSEL in an amended form and certain new chapters have also been incorporated in the regulatory framework of the KSEL. The Rule Book will be useful for the regulated entities of the Exchange and stock market investors at large for understanding the regulatory framework, rights and obligations as well as recourse available to them in case of dispute.

As a result of above developments, KSEL comes at par with any developed stock exchange. The KSEL acknowledges the cooperation extended by the SECP, the Board of Directors of KSEL, the RAC and the management team of KSEL in formulation and implementation of the Rule Book.

FOREWORD

The Rule Book is a landmark achievement in the history of Karachi Stock Exchange Limited (KSEL) as it strengthens the regulatory framework of KSEL by providing a wider and deeper coverage to the securities market consequent to its corporatization and demutualization.

The Rule Book will provide the regulated entities, investors, practitioners, educational institutions, associations, professional accountancy bodies and all other readers with comprehensive coverage of the securities market regulations ultimately leading to widespread regulatory awareness and greater compliance.

I congratulate KSEL on this historic achievement.

Syed Muhammad Shabbar Zaidi
Chairman, Regulatory Affairs Committee of KSEL
FOREWORD

Karachi Stock Exchange Limited (KSEL) has the distinction of being the leading stock exchange of Pakistan by facilitating long-term capital mobilization for industry while providing an efficient and transparent platform for securities trading for investors. Evolution of the regulatory and operating eco-system of KSEL has been an ongoing process. This process received a major boost through the Corporatization and Demutualization Act of 2012 which provided an opportunity for a thorough review of the myriad rules, procedures and policies governing KSEL’s operations, the role of various market participants and issuers of listed securities, as well as ensuring investors’ interest.

In this context, the present compilation of rules and regulations in a single document (the Rule Book) will provide the necessary foundation for the regulatory eco-system that allows clarity of roles and responsibilities for capital market participants. It is a pleasure to see the launch of the first ever consolidated regulatory document in the form of KSEL Rule Book.

Nadeem Naqvi
Managing Director, KSEL
FOREWORD

A fair, efficient and transparent regulatory system of the securities market is an important source of sustaining trust and confidence of the market participants in the capital market. The implementation of the Rule Book is a significant step in this direction. The Rule Book effectively updates the earlier regulatory system of the KSEL enforced prior to demutualization of KSEL with clearly spelled out rights and obligations in compiled form for easier understanding with relevant contexts. In my opinion, this will open doors to new era of effective regulatory and compliance regime for smooth and fair operations of the securities business.

Our efforts will remain to continuously evolve the contents of Rule Book and introduce or revise chapters/clauses to improve effectiveness and address redundancies for robust regulatory and enforcement regime.

Shafqat Ali
Chief Regulatory Officer, KSEL

(a) Current Market Price as of the date the exchange receives the sponsors/ majority security holders’ intimation under 5.13.1
(b) Average Market Price (Annualized)
(c) Intrinsic value per share (estimated net realizable value of assets of the company)
(d) Earnings Multiplier approach (for profitable companies)
(e) The maximum price at which the Sponsors had purchased these shares from the open market in the preceding one year

Explanation:

Intrinsic value per share:
The intrinsic value per share will be determined on the basis of revaluation of assets, carried out by professional evaluator approved by Pakistan Banks’ Association (PBA), any Investment Bank or Valuers having relevant expertise and duly certified by the Auditors falling in Category ‘A’ or ‘B’ of SBP list. The revaluation of assets carried out by the evaluators shall not be older than six months from the date of receipt of buy-back application. The intrinsic value may also include any other factor in addition to tangible and intangible assets of company, which may be considered appropriate by the Exchange, while fixing the price of shares.

Earning Multiplier approach (for profitable companies):
A profitable company is a company that declares an after tax profit for the three years preceding the date of the application for voluntary de-listing as reported in its annual audited accounts.

Fair value = Estimated Earnings * P/E ratio:
Estimated earnings should be arrived at using the weighted average earning per share of the last three years audited accounts. For this purpose, higher of, weights of 45%, 35% and 20% assigned to preceding three years respectively or latest earning per share should be used. The P/E ratio to be used may be of the date the Exchange receives the application under 5.13.1.

This approach is based on the identity that a stock’s current price is the product of its actual earnings per share and the P/E ratio. The P/E ratio is calculated by dividing the current price by the actual earnings per share. To determine the value of stock, both the earnings and the P/E ratio will have to be estimated.

Price may be determined as a multiple of the P/E ratio of the related sector as on the date of application for the voluntary buy-back of shares. Earnings per share may be based on the latest audited accounts of the companies in that sector or a weighted average earning per share of last 3 years of those companies.

Average Market Price:
Daily closing price of the three years proceeding the date the Exchange receives the intimation under 5.13.1 should be used to calculate the Average Market Price.

5.13.2. The final minimum purchase price of the securities to be de-listed shall be fixed with the approval of the Exchange.

At the same time the Exchange shall determine the minimum percentage of securities to be purchased by sponsors to qualify for de-listing and the same will be communicated to the company.

If a clear result cannot be achieved when the first decision rule is applied, the mechanism progresses to the second decision rule and so forth. The decision rules are applied in the order provided hereunder.

Each symbol has only one Opening Price. The Opening Price is calculated based on the available orders in the regular book. To calculate the Opening Price, the following rules are applied:

i. At each price level the total volume available in the market is calculated. The total volume available is determined separately for both buy and sell side of the market. The price level that allows the maximum volume of shares to trade is the Opening Price.

ii. If more than one price level allows the maximum volume of shares to trade then the price level that has the minimum imbalance in share volume becomes the Opening Price. Imbalance in share volume is the number of shares remaining after all trades occur at a particular price level.

iii. If more than one price level allows the maximum volume of shares to trade and have an equal minimum imbalance in share volume, then the price level with the least net change from the Closing Price of previous day or from last trade price of previous trading session, whichever is applicable, becomes the Opening Price.

iv. If more than one price level allows the maximum volume of shares to trade, have an equal minimum imbalance in share volume, and have an equal least net change from the previous day Closing Price or last trade price of previous trading session, then the highest price level becomes the Opening Price.

8.15.6. Orders Not Completely Filled: All Orders entered during the Pre-Open Session will have a time priority based on the actual time of entry. For Orders not completely filled at the Pre-Open, this time priority will be maintained thereafter during the trading day/trading session. Limit Orders entered during the Pre-Open are subject to the same procedures that govern their entry during the trading day.

8.15.7. Open Session: After the completion of Order Matching and Confirmation Period the Open Session will commence for regular trading activity subject to these Regulations.

Notwithstanding anything contained above, all Orders entered during Order Entry Period that remain unfilled during Pre-Open session shall not be cancelled/modified for three minutes immediately after start of the Open Session or for such time period as specified by the Exchange with prior approval of the Commission from time to time.

8.15.8. Frozen Trades: The Exchange can define parameters that can cause any trade that violates them to be “frozen” so that it can be examined before they decide to allow it or prevent it. This is based on such things as a drastic change in the trade price or an extremely high volume. The monitoring that takes place during the trading day is also in effect during the open. Any trade that violates freeze parameter at the open will result in a freeze. All the trading done for the open of the current company is placed on hold until the Exchange decides how to proceed. The final settlement price thus arrived at shall be rounded to the nearest paisa per unit or other such amount per unit determined by the Exchange;

(f) “Open Interest in a Scrip” shall mean the total number of Contracts, of a Broker and his clients, of a scrip that have not been offset and closed at any point in time by an opposite transaction. For calculation of open interest only one side of the Contracts is counted;

(g) “Open Position in a Scrip” shall mean the sum of long and short positions of a Broker and his clients at any point in time in a Contract for that scrip.

14.2. TRADING:

14.2.1. Trading in CSF Contracts shall take place through KATS.

14.2.2. Any Broker may enter into CSF Contracts under this chapter subject to prior notification in writing to the Exchange and payment of basic deposit as mentioned in Deposits, Fee, Contribution and other Sums Schedule.

14.2.3. ELIGIBILITY OF SECURITIES:

(a) The securities eligible for trading in the CSF Market shall be determined and implemented by the Exchange every six month in accordance with the requirements prescribed for final review and notice period under the Uniform Criteria.

(b) The securities selected biannually under 14.2.3.(a), shall be reviewed in accordance with the requirements for interim review as prescribed in Uniform Criteria.

Provided that the above requirement of interim review shall be waived where the implementation date of interim review coincides with that of final review.

14.2.4. The Contract specifications for the CSF Contract as determined by the Board and approved by the Commission and attached hereto as Annexure-A, shall form part of these Regulations.

14.2.5. When a buyer/seller accepts a bid/offer of a CSF Contract, the said Contract with the specifications as mentioned in Annexure-A attached hereto this chapter shall be deemed to have been taken place between the buyer and the seller.

14.2.6. All offers/bids made may be accepted for or up to the limit of the offer/bid and the Broker making an offer/bid shall be bound by terms of the CSF Contract.

14.2.7. Upon opening of any CSF Contract, the Exchange shall notify the name of the company, dates of opening, closing and settlement of the said Contract and other relevant details as mentioned in Annexure-A to this chapter.

14.2.8. There shall be one standardized 90 days CSF Contract which shall be issued each month on the first trading day following last Friday of each month for each eligible security. However, the Exchange shall also have discretionary powers to introduce a contract of 30 and/or 7 days. The 30 and 90 days contracts shall expire on the last Friday of the respective month of the Contract whereas the 7 days contracts shall start on each Monday or first trading day of the week and shall expire on each Friday (or last working day of the week). No overlapping period is allowed in the CSF Contracts.

The CSF Contracts shall be identified by the trading symbols of the underlying eligible securities under the respective CSF Contracts and such trading symbols shall be decided by the Exchange.

14.2.9. The expiration date/last trading day shall be the last Friday of the respective calendar month in which the 30 or 90 days CSF Contract shall expire and/or each Friday of the week in case of 7 days Contract. If the relevant Friday is a trading holiday, then the respective CSF Contract shall expire on the preceding trading day.

14.2.10. In a 90 days CSF Contract, the CSF Contract Multiplier will be adjusted for corporate actions like bonus issue or right issue in the underlying scrip. The adjustment will take effect from the day on which trading in Ready Delivery Contract Market commences on ex-entitlement basis. For example; when the CSF Contract Multiplier is 500 and there is a 1-for-2 bonus share issue (i.e. for every 2 existing shares, the holder gets one additional share), the CSF Contract Multiplier will be adjusted to 750 (500 x 3/2). When the Contract Multiplier is adjusted, the price of each share in the Contract will correspondingly be adjusted by the Exchange. In the above example, in case of bonus issue, the price of each share in the Contract will be adjusted to 2/3 of its Closing Price of the trading day which is just preceding to the day on which trading in Ready Delivery Contract Market commences on ex-entitlement basis. For instance, if the price was Rs 150 it would be Rs 100 (150 x 2/3). Similarly, when there is a 1-for-2 right issue, the CSF Contract Multiplier will be adjusted to
750 (500 x 3/2) on the ex-right date. When the CSF Contract Multiplier is adjusted, the CSF Contract price ruling on the ex-right date will correspondingly be increased by the exercise price per share multiplied by 250. The adjusted price per share of the CSF Contract would increase, decrease or remain same, depending upon whether the right shares have been offered at a premium, discount or par respectively, to its Closing Price of the trading day which is just preceding to the day on which trading in Ready Delivery Contract Market commences on ex-right basis. The adjustment of CSF Contract Multiplier shall be applicable only to the CSF Contracts that are trading as of the corporate action date. When the next new Contract is traded its CSF Contract Multiplier shall be reinstated to the original lot size determined by the Board. (No mark to market differences by virtue of such adjustments shall be payable or receivable on the ex-entitlement date).

Provided that in case of 30 days CSF Contracts, in the event of declaration of bonus and/or right and/or cash dividend after commencement of Contract pertaining to a security being traded in the CSF Market for which the share transfer books of the company are to be closed during the pendency of the settlement, the Exchange shall predate the last day of trading and the settlement date of that particular security's Contract before the book closure date.

Provided further that in 30 and/or 7 days CSF Contracts where a company announces book closure for any one or more of the above mentioned entitlements before opening of the respective Contract and its book closure falls within the Contract Period, the corresponding 30 and/or 7 days Contracts shall be opened on the first trading day of that month/week on an ex-entitlement basis.

14.2.11. In case where the cash dividend is declared in a scrip, no adjustment would be made by the Exchange in the 90 days CSF Contracts.

14.3. CLEARING AND SETTLEMENT:

14.3.1. The Clearing House/ Clearing Company shall receive payments from Brokers on settlement days within the time specified by the Exchange/ Clearing Company. In case any Broker fails to make any payment to the Clearing House / Clearing Company within the specified time, default proceedings shall be initiated against that Broker under relevant KSE Regulations and NCCPL Regulations.

(c) Scrip-wise outstanding position of Brokers will be revalued at relevant Daily Settlement Price. The system will consider such revalued amounts as traded values for collection of MtM Losses and for making payment of MtM Profits.

14.3.3. FINAL CLEARING AND SETTLEMENT:

Upon closing of the CSF Contract, final settlement shall take place on T+1 basis and the resulting profits or losses, calculated on the basis of “Final Settlement Price” shall be settled in cash. The payment and collection of profits or losses on final settlement to/from Brokers shall be carried out by the Clearing Company within the stipulated time and in the prescribed manner.

14.3.4. SPECIAL CLEARING AND SETTLEMENT:

The Exchange may announce a special clearing in a CSF Contract or all CSF Contracts or in a particular scrip or all scrips in a CSF Contract or all CSF Contracts, subject to the prior approval of the Commission, in an emergency situation which may include but is not limited to abnormal country wide riot or strike, fire, accident at the Exchange, change of government or act of God or for any other catastrophic event. In case a special clearing is announced, trading shall be suspended and all Open Interests will be required to be settled within one day of the suspension or prior to the opening of the market. The market would remain suspended till further notice from the Exchange. On resumption of the market, three new Contracts would open from the date of resumption in place of the three suspended Contracts, expiring on the original expiry date as per these Regulations. Similarly if Commission considers that the market is overheated or such indicators exist and the Commission feels it expedient in the investors’ interest to call for special clearing then it may direct the Exchange to cause a special clearing as detailed above.

(i) If the cumulative volume in a security is at least 500 shares or Rs. 25,000/-, whichever comes earlier (here in after referred to as the “threshold”) then the Closing Price of that security shall be determined as Volume Weighted Average (VWA) price of trades of last 30 minutes before closing of the market.

(ii) If the cumulative volume in a security during last 30 minutes before closing is less than the threshold, then the Closing Price of that security shall be determined as VWA of the most recent executed trades during the day which constitute the threshold.

(iii) If cumulative volume is less than the threshold or there is no volume in the security during the whole trading day, then Closing Price shall be the VWA of executed trades and either all bids or all offers entered in KATS during the whole trading day. Such VWA price must be better than the previous day’s Closing Price, provided that:

i. Cumulative volume of either all bids or all offers entered at order level and executed trades are equal to or greater than the threshold.

ii. Such bids or offers are entered in KATS at least two hours before the market close and remained unchanged during such period.

iii. Such bids or offers are available for trade at the time of closure of the market.

Explanation: The term “better”, for the purposes of this clause, means the following:

i. if VWA price of all bids and executed trades is greater than the previous day’s Closing Price, the VWA of all bids and executed trades; otherwise

ii. if VWA price of all offers and executed trades is less than the previous day’s Closing Price, the VWA of all offers and executed trades; otherwise

iii. where both (i) and (ii) above do not apply, then the previous day’s Closing Price shall be applicable.

(v) Cross trades at Broker’s level, and trades which are executed under the same UIN, if any, shall not be eligible for the determination of Closing Price of the respective scrip.

Provided that in case no trade takes place during the whole trading day in the Deliverable Futures Contract Market or Cash-Settled Futures Contract Market in a particular security, the Closing Price of that security for respective futures market will be updated on the basis of Theoretical Price.

(b) The Exposure of a Broker is determined as per following methodology:
(i) Actual traded values of the trades executed on account of a UIN on Trading System are taken for the purpose of calculating Exposure of respective UIN.

(ii) The impact of rectification of erroneous trades on UIN basis carried out on the same trading day in the manner and procedure prescribed by the Exchange from time to time shall also be taken for the purpose of calculating Exposure of a respective UIN.

(iii) All trades due for settlement on that day will be excluded for calculation of Exposures, once settled.

(c) The Theoretical Price for a Security tradable under Deliverable Futures Contract and/or Cash/Settled Futures Contracts Markets, if there is no trading in such Security in the respective market during whole trading day, is determined as per following methodology:

(i) The Closing Price of underlying Security in the Ready Delivery Contract market x \(1 + (\text{One Month KIBOR} + 4\%) / 365 \times \text{DTM}\);

(ii) In case of ex-entitlement Contracts, the Theoretical Price will be adjusted based on ex-price adjustment formulas determined by the Exchange.

19.4. EXPOSURE AND NETTING:

19.4.1. DETERMINATION OF EXPOSURE:

(a) Security-wise, UIN-wise and Market-wise Exposure of each Broker will be calculated by the Risk Management System of the Exchange at any point of time subject to applicable netting rules, as prescribed by these Regulations.

Provided that in case of Ready Delivery Contract Market, Exposure of each Broker shall be calculated at the higher of the values determined either by summing-up all settlement day wise net outstanding buy positions or all settlement day wise net outstanding sale positions of the same client in the same security in the Ready Delivery Contract Market at any point in time, subject to the applicable netting rules as prescribed by these Regulations.

(b) The Exposure of a Broker in respect of the trades executed on behalf of his institutional clients which are Non-Broker Clearing Members of NCCPL and affirmed by the respective Non-Broker Clearing Members shall be reduced to the extent of such trades after receiving confirmation from the NCCPL that the Exposure margins and MM Losses computed in accordance with NCCPL Regulations have been duly deposited by such Non-Broker Clearing Member with the NCCPL. In case of default by a Non-Broker Clearing Member on affirmed trades, to fulfill its securities or money obligations towards NCCPL on the settlement date, default proceedings shall be carried out in accordance with NCCPL Regulations. Un-affirmed trades shall be the proprietary trades of the Broker in the same market and included while calculating Exposure and relevant margins of the Broker.

(c) No netting whatsoever, in any Market, shall be allowed for the purpose of calculation of Exposure and relevant margins in lieu of Margin Financing transactions.

(d) Exposure during Calendar Spreads in DFC and CSF Markets: During the over-lapping period of DFC or CSF Contracts, the Exposure in a particular scrip will be calculated based on the higher of Contract period-wise net-buys
and net sales based on netting mechanism explained in clause 19.4.4. (Netting within Deliverable Futures Market and 19.4.5. (Netting within CSF (Cash-Settled Futures) Markets. However, all Contract period-wise net-buys or net sales will be added together for determining total Exposure under one UIN in a security.

(e) Exposure of a Broker in Index Options Market shall be calculated by summing up all the contract values of his proprietary and clients’ short positions as an Option Writer and/or Option Seller subject to the netting rules prescribed below. Provided that in the case of short positions in Call and Put Options in same Option Series, Exposure shall be calculated at the higher of contract values of such Put or Call options. The Exposure of a Broker in Index Options Market shall also include sum of all his proprietary and clients’ outstanding obligations in respect of option premium of all Option Contracts purchased during a trading day.

19.4.2. NETTING - GENERAL RULE:

Except as expressly provided otherwise in these Regulations, no netting of Open Positions shall be allowed across Markets.

19.4.3. NETTING WITHIN READY DELIVERY CONTRACT MARKET:

Netting shall be allowed between buy and sell positions in the same security for the same Settlement Day for the same UIN (client). Likewise buy and sell positions of a Broker’s proprietary UIN in same security for the same Settlement Day shall be netted against each other.

19.4.4. NETTING WITHIN DELIVERABLE FUTURES MARKET (INCLUDING PROVISIONALLY LISTED SECURITIES):

Netting shall be allowed between buy and sell positions in the same security for the same client in the same contract period. Likewise buy and sell positions in same security in the same contract period for the proprietary trades of a Broker can be netted against each other.

19.4.5. NETTING WITHIN CSF (CASH-SETTLED FUTURES) MARKET:

CSF Market shall be considered a separate market for the purposes of calculating Exposure of a Broker and netting shall not be allowed with Ready or Deliverable Futures Contract Market.

Netting shall only be allowed between buy and sell positions in the same security for the same client in the same contract period. Likewise buy and sell positions in same security in the same contract period for the proprietary trades of a Broker can be netted against each other.

19.4.6. NETTING WITHIN STOCK INDEX FUTURES CONTRACT MARKET:

For the determination of the market Exposure for 90 Days SIF Contracts following netting regime shall be applicable:

(a) Netting shall only be permitted between buy and sell positions in the same SIF Contracts with the same expiry date for the same client. No other netting shall be permitted inter-alia including netting across different markets, across different clients, across SIF Contracts having different expiry dates or across index futures contracts based on different indices.

(b) Where the Exchange determines that circumstances warrant in the best interest of market and market participants that a pre-close of the contracts is necessary, the Exchange may announce special clearing in the following manner:

(i) The Exchange will announce a special clearing with prior approval of the Board.
(ii) For the purpose of settlement of outstanding SIF Contract, the Exchange will calculate a reference price as fair-value of the contract on which all outstanding contracts will be settled.
(iii) Fair-Value is to be arrived at as a function of cash or underlying index value plus financing charges (determined as a function of KIBOR rates) less any dividends that would accrue with the purchase and carry of all Index constituent until the final settlement date.
(iv) The following formula shall be used to calculate fair-value for stock index futures:

\[
= \text{Underlying index } [1+r(x/365)] - d
\]

Where \( r \) = rate of interest, \( x \) = number of days to maturity and \( d \) = dividends

Special margin shall be payable by a Broker in respect of an SIF Contract if the difference between Daily Settlement Price and the first day’s Daily Settlement Price of such contract on either side (i.e. upward or downward) is greater than 20%, or where the Daily Settlement Price of the contract is outside the band of 15% of the underlying Index (higher amount from above calculations will be applicable as special margins). Where the unidirectional price movement is upwards, each client of a Broker who is a net buyer shall be required to pay a special margin in cash equal to such difference. Where the unidirectional price movement is downward, each client of a Broker who is a net seller shall be required to pay a special margin in cash equal to such difference.

19.4.7. NETTING WITHIN MT TRANSACTION:

Only MT (R) Transaction communicated to the Exchange will be netted off with a sale by a Broker on account of respective UIN in the respective security, otherwise no netting whatsoever shall be allowed with the Ready Delivery Contract Market.

19.4.8. NETTING WITHIN INDEX OPTIONS MARKET:

Index Options Market shall be considered a separate market for the purpose of calculating exposure of a Broker and netting shall not be allowed with any other Market.
Netting shall be allowed between the short positions of a client as an Option Writer and/or Option Seller and his buy positions in an Option Contract of equal Contract Value, having same Option Type and same Option Series. Likewise, proprietary position as an Option Writer and/or Option Seller and buy position in an option contract of equal Contract Value, having same option type and same Option Series, can be netted against each other.

No other netting shall be permitted inter-alia including netting across different markets, across different clients, across Option Contracts having different expiry dates or different Underlying Index.

19.4.9. **RESTRICTION/PROHIBITION:**

Save as specifically provided above or in the relevant chapters of the KSE Regulations in case of 19.4.6 and 19.4.7 above, no other netting such as across clients, across markets, across contract period, across settlement period, across different securities or contracts shall be allowed whatsoever.

19.5. **EXPOSURE MARGINS:**

19.5.1. **MARGIN REQUIREMENTS:**

(a) All trades in any security or securities shall be subject to the margin requirements prescribed in the Regulations or such other additional margins in this regard as the Exchange may, with the prior permission of the Commission, from time to time prescribe in addition hereto.

However, the total margins requirements (including initial margins, Concentration margins and/or Special Margins) added together, for particular scrip under a UIN should not exceed its Exposure amount in any case. In case, where total margin requirements exceed the Exposure amount, Special Margins requirements shall be reduced to the extent of the exceeding amount.

(b) Pre-Settlement under Ready Delivery Contract Market or Deliverable Futures Contract Market: In case where a UIN-wise net-seller in a security deposits the net-sold deliveries and/or net-buyer in a security deposits net cash against such net-buy with the Exchange or NCCPL, all his margin requirements and MtM Losses/Profits to the extent of such pre-settlement shall not be taken into account by the Exchange, while calculating such Broker’s Capital Adequacy limits and margin requirements for respective market.

19.5.2. **VAR BASED MARGINS:**

(a) **CATEGORIZATION OF SECURITIES:**

The securities shall be classified into four categories on the basis of following:

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>SCALE UP FACTOR</th>
<th>NO. OF DAYS COUNT (BASED ON AVAILABILITY OF RS.500,000 TRADE DATA)</th>
<th>IMPACT COST</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>1</td>
<td>≥ 80% of traded days</td>
<td>≤ 1%</td>
</tr>
<tr>
<td>B</td>
<td>√3</td>
<td>≥ 80% of traded days</td>
<td>&gt; 1% ≤ 2%</td>
</tr>
<tr>
<td>C</td>
<td>√5</td>
<td>≥ 80% of traded days</td>
<td>&gt; 2%</td>
</tr>
<tr>
<td>Illiquid - D</td>
<td>If the tradable days even with one (1) lot in a scrip is less than 33%</td>
<td></td>
<td>Irrespective of IC</td>
</tr>
</tbody>
</table>

(b) **MONTHLY REVIEW:**

The trading frequency and the Impact Cost shall be calculated on the 15th of each month on rolling basis considering the data of preceding six months. On the basis of the trading frequency and impact cost so calculated, the securities shall move from one group to another from the next trading day.

(c) **CALCULATION OF VAR MARGIN:**

VaR margin will be based on Risk Meter calculation using the following three methods:

(i) Variance/ Covariance,
(ii) Historical/Filtered Historical Simulations, and
(iii) Exponentially Weighted Moving Averages (EWMA)

The highest VaR margin calculated under the above three methods is taken as the VaR or Raw VaR.

The Raw VaR is then scaled up by a factor of √n to cover an ‘n’ day risk based on the underlying scrip’s liquidity as demonstrated by its categorization on the basis of trading frequency and impact cost in 19.5.2.(a) above. Based on the respective categorization, the Raw VaR numbers for each scrip are then scaled up by a factor of √1, √3 and √5 respectively. For securities falling in the D category, maximum VaR i.e., 60% shall be applied. The number so arrived shall be called as Scaled up VaR.

A Worst Case Margin is added to the Scaled up VaR to cover 1% of the days (extreme events) that go beyond those envisaged on the 99% value at risk estimates used in the calculation of Raw VaR. The margin so arrived shall be known as the VaR Estimate.

The Worst Case Margin is the higher of:

i. 5%
ii. 1.5 times the standard deviation of daily returns of the stock price in the preceding six months or one year (whichever is higher) and

iii. Maximum breach in the security’s VaR back tested over one year trading days (peaks over threshold)

(d) The Exposure margins for each security in Ready and Deliverable Futures Contracts markets shall be calculated by the Exchange applying VaR Estimates calculated by the Risk Meter at the end of each trading day.

(e) The Exposure margins for each Security in Cash-Settled Futures Contract Market shall be calculated by the Exchange applying Scaled-up VaR calculated by the Risk Meter at the end of each trading day.

(f) The Exposure margins in Stock Index Options Markets shall be calculated by the Exchange applying VaR of the underlying index calculated by the Risk Meter at the end of each trading day and adding Worst Case Margin. The deposit against exposure will be payable by the Brokers at flat 12.5% of the total exposure in the Stock Indices Futures Market.

(g) The Exposure margins so determined shall be posted on website of the Exchange and shall be applicable for determining margin requirement at the end of each trading day.

19.5.3. FIXED MARGINS:

Exposure margins during the first six months of listing of a security on the Exchange shall be 25% of the Exposure.

19.5.4. DEPOSIT OF EXPOSURE MARGINS:

(a) The Exposure margins shall be deposited by a Broker within such time as may be determined by the Exchange from time to time but in no case later than the opening of the market on the next trading day.

(b) Bank slips duly posted in the Exchange’s bank account and Pay Order(s) shall be delivered to the Exchange within the prescribed time against the demands in relation to exposure margin/Mark-to-Market losses. However, payments up to Rs. 2,500,000/- for the purpose of payment against exposure Margins and losses may be accepted by cheque.

(c) Exposure Margins deposited by a Broker under these Regulations, pertaining to different markets must be kept separately by the Exchange. In case of any practical difficulty, margins in respect of different markets, deposited by a Broker, may be kept on a combined basis; however in case of default of the Broker in a particular market, such combined margins will be allocated in each market based on exposure of the Broker in that market.

19.5.5. FORM OF MARGIN DEPOSITS:

Margins payable by a Broker under these Regulations will be accepted by the Exchange in the form as specified in Schedule-III.

19.5.6. CONDITIONS APPLICABLE TO ALL MARGIN DEPOSITS:

(a) The Exchange may from time to time prescribe, with the prior approval of the Commission, Haircuts applicable to each Margin Eligible Security;

19.5.7. VALUE OF MARGIN DEPOSIT TO BE MAINTAINED:

The Broker depositing margin in the form of Margin Eligible Securities shall always maintain the value thereof, after application of the relevant Haircuts, at not less than the margin amount for the time being required to be covered by them by providing further Margin Eligible Securities or depositing cash to the satisfaction of the Exchange which shall always determine the said value and whose valuation shall conclusively fix the amount of any deficiency to be made up from time to time. If at any time during a trading day, the required margins against Exposure of a Broker and its clients exceed the already deposited margins, such Broker shall deposit with the Exchange the margin computed by the Exchange Trading System within the time specified by the Exchange, but not later than opening of the market on the next trading day.

Provided that the basic exemption permissible to a Broker under the regulations applicable to a particular Market will be deductible while calculating such MtM Losses of the Broker.

All short positions in Call and Put Option Contracts of an Option Writer and/or Option Seller shall attract Mark-to-Market Loss calculations.

19.6.2. NETTING:

While determining the MtM Losses (or profit) payable by a Broker, netting shall be permissible across trades in different securities for the same client or across trades in different securities for proprietary trades of a Broker, in the same settlement date or contract period.

In the case of Index Options Market, when determining the MtM Losses payable by a Broker, netting shall be permitted between MtM profits and losses of buy and sell positions of an Option Writer and/or Option Seller in the same type of Option Contract with same Expiration Day and same underlying index for the same client or between Proprietary buy and sell positions in the same type of Option Contract with same the Expiration Day for the same underlying index.
